

H06.03.01 CONTENT FILE

This CONTENT file lists the Software Product Revisions (SPRs) that are included in, and excluded from, this Release Version Update Revision (RVUR). It cites all SPRs for Product Versions released with and since G06.20 that were available shortly before the First Customer Shipment (FCS) of H06.03.01.

This file consists of two parts: Part 1, Included SPRs, and Part 2, Excluded SPRs. SPRs for obsolete products are not listed in Part 2, but might appear in Part 1 if replacement products include the SPR's function.

Check the Software Product Maintenance List (SPML) file to determine whether a product is supported in the new RVU. The latest SPML and Hardware Product Maintenance List (HPML) can be found in the NonStop Technical Library (NTL) by using the following steps:

1. Click Support Content on the navigation pane
2. Click General Support on the content pane
3. Click Release Docs on the content pane
4. Click the appropriate year (for example, 2003)
5. To view the desired document click on either the Software Product Maintenance List (SPML) or the Hardware Product Maintenance List (HPML).

This CONTENT file is on the SUT in TGAL format as the file CONTENT in the Y9230* subvolume.

More current SPR information, if it exists, can be found using Scout for NonStop Servers.

26 September 2005

Revision History

H06.03.00	31JUL05	Initial Release.
H06.03.01	26SEP05	RVU Revision.

Documents inclusion of the following SPRs:

- T0288AAB - Standard Millicode
- T0613AAC - G4SA Download Code
- T0630AAF - FCSEA F/W
- T1269AAC - NSK CRE/RTL
- T6048AAD - SUTVER
- T9050APY - Nonstop Kernel
- T9196AEA - TSQFLFIL
- T9230AKB - RLSEDOC

H06.03.01 CONTENT
Included SPRs

Part 1: Included SPRs

Listed below are the SPRs for Product Versions released with and since G06.20 whose complete fixes and features are included in H06.03.01. Initial Product Version Updates (PVUs) are indicated by blanks in the "Updt" column. This list contains the following three types of SPRs:

o SPR in H06.03.01

SPRs with an "*" under "SPR in H06.03.01" are present (i.e., have some or all of their distributed files) in H06.03.01.

Products that have only Successive PVUs marked in this column may nevertheless have files from the initial PVU in the DSV. Successive PVUs often do not include every file for a product.

o New and Changed Products in H06.03.01

SPRs with a "+" under "Change from H06.03.00" are present in H06.03.01 but were not present in H06.03.00, which is the base RVU for H06.03.01. They might be for new products or be changes to existing products. Products unchanged from H06.03.00 do not show a "+" in the "Change from H06.03.00" column.

Review the H06.03 Release Version Update Compendium for a summary of what has changed between G06.24 and H06.03.00, and the softdocs of the SPRs with a "+" under "Change from H06.03.00" for details.

o SPR Included in H06.03.01

SPRs with an "I" under "SPR Included in H06.03.01" are included in the RVU in some form, though the SPRs themselves are not present.

The fixes and features of these SPRs might be in this RVU because they have been carried forward into the SPRs if either:

- the same product
- a different product
- a combination of products

Obsolete products and products that were never available for the Release Series for H06.03 might appear as "Included SPRs" because another product or combination of products in this RVU offers equivalent functions. SPRs for such products are not in this RVU, and so do not have an "*" under "SPR in H06.03.01".

H06.03.01
Excluded SPRs

Part 2: Excluded SPRs

Listed below are SPRs for Product Versions released with and since G06.20 that have at least one fix or feature NOT included in H06.03.01. The fixes and features of these SPRs might be either completely or partially absent from this RVU.

Since some of the fixes and features of these SPRs might be included in this RVU, if you have an SPR in this list installed on your system, follow the instructions given for functional regression avoidance in the Managing Software Changes manual to determine whether the SPR's particular fixes and features of interest are included in H06.03.01.

SPRs for obsolete products are not listed here. See the Software Product Maintenance List (SPML) file for a list of obsolete products. To research an SPR for an obsolete product, check the SPML file to see if another product replaces the obsolete product. If it does, any SPRs for the obsolete product that are functionally included in the new RVU are listed in Part 1, Included SPRs, of this file. If an SPR for an obsolete product is not listed in Part 1, assume that it is excluded from H06.03.01.
