1.1 Checking Version Compatibility

Before installing the beta version of the Neoview Performance Analyzer on your client workstation, check the compatibility of the product version with the Neoview platform.

Product version	Compatible versions of the Neoview platform
Neoview Release 2.3 Neoview Performance Analyzer	Neoview Release 2.3 and later versions

1.2 Installation for the Beta Version of HP Neoview Performance Analyzer

- o Installation Package
- o Installation Requirements
- o Installation Instructions

1.2.1 Installation Package

The beta version of the Neoview Performance Analyzer software is available in this downloadable distribution file:

Distribution File	Supported Platform	File Contents
NPAInstaller_2.3.0.zip	windows XP or higher	setup.exe NPAInstaller.msi

By default, a new version of the Neoview Performance Analyzer will be installed in this directory unless you specify a different directory

during installation:

C:\Program Files\Hewlett-Packard\Neoview Performance Analyzer\

### 1.2.2 Installation Requirements

Computer	Windows compatible PC workstation
Memory	Recommended minimum 512 MB
Disk space	10 MB for installation, plus an additional 64 MB free space
Operating system	Microsoft Windows XP or higher
Network software	Network connectivity to Neoview platform Release 2.3 via TCP/IP
ODBC client	HP Neoview ODBC Client version 2.3 or higher
Additional requirement	Microsoft .NET Framework 2.0

### 1.2.3 Installation Instructions

Installing the HP Neoview Performance Analyzer

Task 1: Download the Neoview Performance Analyzer

1. Close all other applications running on the client workstation.
2. Create a temporary download folder on the client workstation (for example, C:\NPATEMP).
3. From the client workstation, start a browser and navigate to the download site: [www.software.hp.com](http://www.software.hp.com).
4. Search for "Neoview Performance Analyzer" in the Software Depot.
5. Click the HP Neoview Performance Analyzer link that appears in the search results.
6. Follow instructions to download the HP Neoview Performance Analyzer.
7. Extract the contents of the zip file (NPAInstaller.zip) into the download folder.
8. Click NPAInstaller.msi, and save the file to the temporary download folder.

Task 2: Start the InstallShield wizard

The InstallShield wizard walks you through the steps to install the Neoview Performance Analyzer on your workstation.

1. Double-click the NPAInstaller.msi file to start the InstallShield wizard.
2. On the HP logo page, click Next.
3. On the welcome page, click Next.
4. On the select Installation Folder page, fill in the required information, click Next.
5. On the Confirm Installation page, click Next.

6. On the Installation Complete page, click Close to exit the wizard.

#### Uninstalling the HP Neoview Performance Analyzer

Start the HP Neoview Performance Analyzer uninstall process:

Start > Programs > HP Neoview Performance Analyzer > Uninstall Neoview Performance Analyzer

When Uninstall HP Neoview Performance Analyzer is selected, a window is displayed that shows the progress of the uninstallation process. When the window closes, the uninstallation is complete.

#### Reinstalling the HP Neoview Performance Analyzer

To reinstall Neoview Performance Analyzer, HP recommends that you uninstall Neoview Performance Analyzer and then install the new version. See "Installation Instructions" for instructions on installing Neoview Performance Analyzer.

### 1.3 Related Product Documentation

Use of the HP Neoview Performance Analyzer requires the HP ODBC Client version 2.3 or higher for Windows. For more information about the HP ODBC Drivers for Windows, see the HP Neoview ODBC Drivers Manual. This manual is available on the Business Intelligence Solutions page of docs.hp.com: <http://docs.hp.com/en/busintellsol.html>.

Query information, including Neoview operators used in Explain plans, is found in the HP Neoview Query Guide. This manual is available on the Business Intelligence Solutions page of docs.hp.com: <http://docs.hp.com/en/busintellsol.html>.
