How to Obtain Support Notes for your cc3310 Operating System

Please read the following information about supported operating systems and support notes.

Supported Operating Systems for the cc3310 Carrier Grade Server

At this printing, HP supports these operating systems for the cc3310 Carrier Grade Server:

- Red Hat Enterprise Linux 2.1 Advanced Server (Kernel 2.4.9-e.24 and higher).
- Red Hat Enterprise Linux 3 Enterprise Server (Kernel 2.4.21-4.EL and higher: AS and ES versions).
- Microsoft® Windows® 2000 Advanced Server (Service Pack 3 and higher): See **Note** below.
- Microsoft Windows 2003 Advanced Server: See **Note** below.

How to Obtain Support Notes

Support notes contain critical information that should be read prior to installing any operating system on the HP cc3310 Carrier Grade Server.

The latest information on all supported operating systems and the corresponding support notes can be found at <http://docs.hp.com> and other HP support web sites (search for cc3310 and operating systems), and on the *hp server cc3310 user information, diagnostics, and utilities resource CD*.

NOTE Windows 2000 Advanced Server and Windows 2003 Advanced Server require a unique "user developed and customized" installation CD. Instructions on how to build this CD can be found in "Operating System (OS) Support Notes for Windows 2000 Advanced Server and Windows 2003 Advanced Server on the hp cc3310" at <http://docs.hp.com> (search for cc3310) and on the *hp server cc3310 user information, diagnostics, and utilities resource CD*.
