HP Output Distributor 2.0

Technical Update No. 2

This technical update includes important information about HP Output Distributor 2.0 (formerly known as HP Dazel Output Distributor). The purpose of this technical update is to provide information about support of HP Output Distributor 2.0 on the IBM AIX 5.2 operating system.

Support on AIX 5.2

Hewlett-Packard certifies that HP Output Distributor 2.0 at service pack level 03.1 functions on IBM UNIX hosts running the AIX 5.2 operating system.

NOTE: For HP Output Distributor 2.0 at service pack level 03.1 to function properly with supported AIX operating systems, **you must be running the supported AIX operating system with `dce.pthreads.rte` version 2.1.0.0**. The DCE pthreads runtime library included with AIX 5.2 is not compatible with HP Output Server (formerly known as HP Dazel Output Server) libraries that support HP Output Distributor 2.0.

For a complete list of supported operating systems for HP Output Distributor 2.0, refer to “Supported operating systems” on page 2. For information about installing Service Pack 03.1 for HP Output Distributor 2.0, refer to the release notes for Service Pack 03.1 for HP Output Distributor 2.0.

Supported operating systems

The following table identifies the supported operating systems and the respective operating system patches, if any, for HP Output Distributor 2.0 at service pack level 03.1.

Table 1. Operating systems and patches
